7. Additional Requirements for Medical School Communities

- a. Misrepresentation in any social media by any member of the CMSRU or RowanSOM communities, regarding the status of his/her credentials as a medical student or medical professional, is strictly prohibited.
- b. Specific Restrictions under HIPAA and FERPA for Medical Students
 - i. Posting PHI on social media by any individual within the CMSRU or RowanSOM communities is strictly prohibited under the HIPAA regulations, which apply to any information related to patients.
 - 1. Never post a photograph or image of a patient to any electronic media, other than the patient's electronic medical record. Use of cameras or cell phone cameras in the patient care setting shall be for the sole purpose of assisting in the care and education of the patient for educational purposes. Any photographs taken in the patient care setting must be posted to the patient's electronic medical record.
 - 2. Removal of an individual's name does not constitute proper de-identification of PHI. Inclusion of data such as age, gender, race, diagnosis, date of evaluation, type of treatment, or the use of a highly specific medical photograph (such as a before/after photograph of a patient having surgery or a photograph of a patient from medical outreach trips) may still allow the reader to recognize the identity of a specific individual.
 - 3. Never post derogatory or defamatory remarks about any patient (either current or past) to any social media, including any social media deemed to be "private."
 - ii. Posting of any student records on social media by any individual within the CMSRU or RowanSOM community is strictly prohibited under the FERPA regulations.
 - 1. FERPA-protected academic information of another medical student or trainee might include, but is not limited to, course or clerkship grades, narrative evaluations, examination scores, or adverse academic actions.
 - iii. All individuals within the CMSRU and RowanSOM communities must take steps to ensure compliance with all federal and state laws and regulations, including HIPAA and FERPA, by ensuring that their social media has the appropriate privacy settings to avoid the inadvertent dissemination of confidential information, with the understanding that even if they limit the number of people who can see their personal information, others who have access to this information may share it more broadly.
 - iv. It is inappropriate for a CMSRU or RowanSOM medical student to accept "friend" requests from patients, unless the physician-patient relationship has ended. Even after the physician-patient relationship has ended, it would be inappropriate to discuss health-related information on social media.
 - v. The public disclosure or negative information about CMSRU, RowanSOM, or affiliated clinical rotation sites on social media increases the risk of liability to the University and is clearly unprofessional. There are legitimate and confidential mechanisms for improving quality at a medical facility.
 - vi. The specific sanctions to be imposed for non-compliance with HIPAA or FERPA laws and regulations, illegal activities, or violation of University/CMSRU/RowanSOM policies and procedures, will depend upon the severity and legal implications of the activity under review. Action will be initiated as appropriate in accordance with the classification of an individual (i.e., faculty, staff, medical student, resident, house staff, etc.) and, if necessary, the requirements of the individual's licensing boards, as set forth in the applicable disciplinary procedures within the medical schools' student handbooks. Discipline may range from simple counseling/guidance up to the risk of civil and/or criminal liability under applicable federal and state laws and regulations.
 - vii. Non-Compliance and Sanctions
 - 1. Violations of this policy may result in the revocation of social media contact and account privileges.

2. A disciplinary or other review may be initiated if any member of the University community's social media activity violates law or University policy or otherwise subjects the University to potential liability for such acts.
3. The purpose of this section is not intended to provide for the investigation of, or disciplinary action against, members of the University community for the legal exercise of their First Amendment rights.

Unauthorized disclosure or access may present legal and reputational risks to the University. See the University's Information Classification policy for additional clarification.
