Welcome to the Office of [Research!](#)

We exist to promote, support and administer the research, scholarly and creative activity of all faculty, staff and students at Rowan University. We are here to support faculty, staff and students in: Identifying opportunities for sponsored research; advocating for our faculty with external research sponsors and collaborators; administering all aspects of the sponsored research process including ensuring compliance with applicable federal, state and university rules and laws; fostering the creation, management and technology transfer of intellectual property; reporting research performance metrics to stakeholders, both internally and externally.

Here you will find the latest funding opportunities and the support you need to submit winning proposals.
